

# ChemClear

## Fact sheet

# Applying stickers to chemical drums

ChemClear stickers are designed to provide:

- your registration number and month of registration
- easy recognition and segregation of chemicals in your chemical storage area while awaiting disposal,
- quick identification of the chemical group classification when delivering to the collection site.

### STEP 1: Sort

Sort your products into Group 1 and Group 2 categories.

**Group 1** chemicals are currently registered (for use), recently out of date, with labels intact, & displaying a **drumMUSTER** eligible logo on the label or container.

drumMUSTER eligible logo

**Group 2** chemicals are any unknown, unlabelled, out of date, de-registered chemical, or, non participating manufacturer products not displaying **drumMUSTER** logo.

### Identifying categories

If you are unable to identify the category of your registration please contact us on 1800 008 182 for clarification.

### STEP 2: Place

Ensure the correct sticker is placed on your chemical container and the container label is displayed

Place the **Group 1 YELLOW stickers** on your Group 1 chemical containers.

**POTENTIALLY HAZARDOUS WASTE**  
THIS CHEMICAL HAS BEEN BOOKED INTO THE CHEMCLEAR® PROGRAM FOR DISPOSAL

### Large stickers

If you have registered large volumes of the same or similar products, we recommend you store them on a pallet, shrink wrap them and place the large sticker on the outside. If no pallet is available use an oversize container, or sort group 1 and 2 separately ready for transport to the collection site.

### STEP 3: Store

Store the chemicals safely until collection time.

### Additions or subtractions to your registration is easy

If you have miscalculated the quantity of chemicals registered or need to add or subtract products from your booking, ring 1800 008 182 and quote your reference number to make changes.

### Regular contact

ChemClear will contact you directly to advise when a collection has been scheduled for your council area.
