

PROGRAM INFORMATION

CLASSIFICATIONS

Group 1 chemicals are **collected FREE*** under the program. These chemicals are currently registered agvet chemicals manufactured by companies supporting the Industry Waste Reduction Stewardship initiative.

Group 2 chemicals are those chemicals that are no longer registered, unknown, unlabelled, out of date, or mixed agvet chemicals. A fee per lt/kg applies for disposal unless a state government subsidy is in place.

*Reseller Policy applies

COLLECTING UNWANTED AGVET CHEMICALS

ChemClear® is a not for profit chemical collection and disposal service for unwanted and unknown agvet chemicals.

The program contributes to the ongoing sustainability of Australia's food and agricultural industries ensuring that unwanted chemicals are collected and disposed of in a safe and responsible manner.

The appropriate collection and disposal of these chemicals minimises their impact on the environment if otherwise left unattended. The service ensures that these possible environmental contaminants are retrieved and in turn reduces waste and the possibility of residual contamination.

ChemClear requires users of agvet chemicals to identify the chemicals they are using and storing, assess the chemicals that need disposing of and register them for the next ChemClear collection in their Shire Council area.

There are only six steps to the program, it's that simple:

Step 1:
Take an Inventory of your unwanted agvet chemicals including:

- manufacturers name

- product name
- container size
- number of containers
- estimation of remaining chemical in container
- container integrity

Step 2:

Register them for collection @ www.chemclear.com.au or Free call **1800 008 182**

Step 3:

Continue to store your registered chemicals safely and securely

Step 4:

ChemClear will contact you directly to advise the location of the collection point for retrieval and provide a quotation for any Group 2 chemicals registered for pick up

Step 5:

Prepare chemicals for delivery to collection site

Step 6:

Deliver your chemicals to the advised retrieval site
